Offshore Wind O&M · Blade Operations · Technical Project Delivery

Wind O&M and technical project professional with 14+ years across blade operations, OEM service delivery, asset-owner O&M and industrial projects. Most recently client-side at an offshore asset owner, coordinating a blade campaign within an intensified major-component programme and sitting in daily operational meetings across all parallel work streams. I keep contractors, documentation and HSE aligned — RAMS, permit-to-work, scope changes, weather windows and progress reporting — and bring PRINCE2 project management with budget, schedule and handover ownership. Deepest technical strength is WTG and blades, backed by a mechanical-electrical technical education; across other disciplines my contribution is coordination and interface management.

Fluent in Polish, English and Dutch. Based in Poland, available immediately, open to rotation, hybrid or project-based work.

PROFESSIONAL EXPERIENCE

Blade Supervisor — Offshore Wind O&M **CLIENT-SIDE / ASSET OWNER**

Eneco Offshore (via Brunel / Taylor Hopkinson) · Prinses Amalia Wind Farm, IJmuiden, NL · Apr 2026 – Aug 2026

- Coordinated blade campaign execution on a 60 × Vestas V80-2MW offshore asset — aligning timelines, resources and contractor readiness against project objectives and client requirements.
- Worked client-side in daily operational meetings across all ongoing works, reporting to the PM for major component exchange on an end-of-life asset — high volume of contractor mobilisations and scope changes.
- Owned risk and compliance across work packages — verifying method statements, RAMS, permits and offshore access authorisation to quality, safety and contractual standards.
- Managed weather-window adjustments, transfer logistics and progress reporting; tracked documentation and work orders in Fieldglass/SAP as key system user.

Service Project Coordinator — O&M

Nordex Group · Poland · Jun 2025 – Dec 2025

- Coordinated maintenance delivery across 3+ wind facilities, managing 10+ concurrent work orders and field resource allocation against OEM maintenance requirements.
- Managed contractor relationships on sourcing, scheduling and scope — supporting the PM team with daily oversight, forecasting and issue resolution.
- Led weekly progress reporting for internal and external stakeholders; sustained full HSE and Permit-to-Work compliance.

Project Manager

Wonderful Lighting Sp. z o.o. · Poland & Belgium · Mar 2024 – Jun 2025

- Managed an international project portfolio (~€2M) end-to-end under PRINCE2 — owning budgets, schedules and timelines while coordinating contractors, scope changes and multicultural stakeholder teams.
- Entered an unfamiliar technical domain and delivered complex installations from initiation to handover.

Project Manager — Construction & Investment Projects

Imest BV (own company) · Belgium · Dec 2020 – Apr 2024

- Delivered construction and real estate projects end-to-end — budgeting, scheduling, subcontractor management and client relations from initiation through to handover.
- Ran the full handover cycle — snagging and punch lists, as-built documentation and acceptance sign-off with clients and inspectors.

Service & Repair Coordinator **5 YEARS — ZERO LTI**

TK Elevator / thyssenkrupp · Belgium · Nov 2016 – Dec 2021

- Owned work-order and contractor oversight for a 500+ unit electromechanical portfolio in SAP — managing schedules, budgets and contract compliance.
- Implemented Permit-to-Work and RAMS procedures (zero LTI over five years); supervised and mentored 20+ field engineers.
- Automated weekly operational reporting with Power Automate, cutting manual effort ~30% and improving data accuracy.

Site Supervisor — Industrial Services (Scaffolding & Insulation)

Contractor-side via agency · clients incl. Hertel Service, Optimus Home · Belgium · Jul 2013 – Oct 2016

- Supervised scaffolding and insulation crews on live industrial installations — coordinating trades and subcontractors against schedule, quality and safety requirements under permit-to-work and site access control.

Team Leader — Blade Operations

LM Wind Power · Europe · Feb 2011 – Mar 2013

- Led multinational field teams (8–12) across European wind sites — coordinating personnel manifests, deployment timelines and logistics while maintaining HSE and permit-to-work compliance.

EDUCATION

2009–2013 **International Relations — Bachelor's Degree**

Naval Academy, Gdynia, Poland

Diploma

Technical Secondary School — Mechanical & Electrical Engineering
